

# Air-Cooled System Tools – BESS

---

## System-Specific Equipment & Safety

In addition to common tools (Module 1), the following are required for air-cooled systems.

### Airflow Meter

#### PURPOSE

Measures fan performance

### Fan Replacement Tools

#### PURPOSE

Screwdrivers, pliers, etc.

### Dust Filters and Cleaning Kits

#### PURPOSE

For maintaining airflow efficiency

## Air-Cooled System Safety

- Ensure fans are de-energized before maintenance
- Use appropriate respiratory protection when cleaning dusty environments
- Verify airflow direction before reassembly
